

Simple yet functional.

We have recently undertaken a new installation of tuneable white LED panels in our office. Along with a selection of other LED luminaires as supplied by our partners [ILLUXTRON](#) and [ORLUNA](#) Lighting.

"On installing the tuneable white I have to say that I was very open minded and slightly dubious as to the value of having such an installation. However after a week of working under the installation, the feedback has been very positive from all" - Steve Sutcliffe

The HELVAR 'select the weather' really is very effective. The control allows us to use a different approach of colour white at differing times of the day and allows dimming if necessary. Whilst the option of the automatic 'change' of outside weather really is quite different, and whilst some might see it as quirky. The applications are endless for people working typically in 24 hour call centres and the like, to be able to apply to change their environment at the flick of a switch. Click the link below to find out more;

'Select the Weather'

Select the Weather (StW) is a simple Human Centric Lighting solution with value added functionality. With this solution it is possible to simulate different scenes of the natural outdoor lighting environment by changing the colour temperature and intensity of the lighting. The solution is easy and quick to install without any configuration needed on site.

Whilst at 4D we do not offer a showroom with individual fittings, we have always maintained that it is better to offer a complete installation of lighting to show its true value and potential benefits. We have achieved this and really do

feel that for something so new, this LED solution is well worth a view. All done at a very affordable cost, making this a really exciting and viable option. As we know that there are single colour LED panels out on the market more expensive than these.

For anyone that would like to pay a visit to our Clevedon office to see this new system in action you are more than welcome, just drop in and you can be guaranteed a warm welcome...
